(54) METHOD FOR APPROXIMATING
COMMUNICATION CHARGE OF
PORTABLE-TELEPHONE LINKING SERVICE

COPYRIGHT: (C)2002,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a method wherein the communication charge of a portable telephone required in the case of an access gained from the portable telephone to an intranetwork system is approximated, and the private-use and business-use portions of the communication charge are discriminated from each other.

SOLUTION: When a user has an access from a portable telephone to an intranetwork system, an access-information outputting section 112 so records the information including an identifier 201 of the user having the access, a size 203 of the request data received from the portable telephone, and a size 204 of the response data answered from the section 112 to the portable telephone that a charge approximating section 114 approximates the communication charge of the access according to a charging method defined every user.
